

Email Encryption and Security

Protect Your Email, Personal Data and Your Company

PERRY proTECH, IT/Networking has partnered with ZixCorp, the industry leader in email data protection, to provide their email encryption and data loss prevention solutions.

ZixGateway

Policy-Based Email Encryption Gateway For Privacy & Compliance

- Appliance can be on premise, virtual, or hosted
- Transparent, secure delivery between all ZixGateway users
- Full content scanning for automatic policy enforcement
- TLS policy support including branding and reporting

ZixGateway® is a policy-based email encryption gateway for privacy and compliance. Sitting on the edge of your network, ZixGateway inspects all outbound email to ensure they adhere to your chosen policies. With full content scanning of the subject line, message body and attachments, ZixGateway can encrypt, route, block or brand outbound email based on corporate policies.

ZixDLP

Email Data Loss Prevention Solution

- Easy to use and cost-effective solution
- Intuitive quarantine interface for both sender and administrator
- Quarantined messages identify what part of the email contains sensitive information and what policy was triggered
- Email sender or compliance officer can determine if quarantined messages should be deleted or released

ZixDLP™ is an email data loss prevention solution that will strengthen compliance with corporate and government policies. This solution leverages the policy and content scanning capabilities of the ZixGateway with an intuitive quarantine interface in order to help prevent sensitive information from being sent outside an organization via email.

ZixDLP can cover your full domain to ensure protection, while the ZixGateway can allow a subset of approved users (such as HR, finance, nursing staff, etc.) the ability to send sensitive data outbound.

ZixMail

Outlook Plug-In For Manual Encryption

- Easy to install and use
- Microsoft Outlook integration option
- Internal and outbound email encryption
- One-click action for encryption and decryption
- No minimum quantity to purchase

ZixMail® makes it easy and cost-effective for individuals, small businesses or select departments to protect sensitive information sent via email. Individuals use ZixMail, Zix's desktop encryption software, to encrypt email to their recipients. ZixMail can be downloaded and installed for use in minutes.

ZixMail | ZixPort

Bundled pricing for ZixMail and Zix's Secure Messaging Portal

Professional Bundle

- ZixPort: customer, secure delivery method for non-Zix recipients
- ZixPort offers superior mobile delivery to recipients
- Enables recipients to compose secure email from customers' email signatures and websites

Small businesses and select departments use our professional bundle, **ZixMail** with **ZixPort**, because the bundle maintains the company branding for messages to recipients and provides the company additional security features. Best yet, this bundle is quick to deploy, quick to set up and quick for end users to learn.

ZixOne

Mobile app that provides connection to corporate email without allowing data to reside on the device

- Corporate data never resides on the device
- No corporate access to personal data
- Simple and convenient user experience
- Employee in control of the device

ZixOne® raises the bar on BYOD security by not allowing corporate email data to reside on the device. ZixOne provides the convenience, control and privacy that employees demand while also satisfying the corporate concern for security and compliance. Through a secure email environment, employees interact with their mobile email as usual.
